

CARBON FIBER MATERIALS

Our experience assures the best solutions...

***Specialists in producing and
manufacturing pieces in carbon fiber
and composites***

Carbones y Sistemas, S.L.L.

C/ Av. Los Pocillos, 10

Nave 1 - P.I. La Carrehuela
28340 Valdemoro (Madrid)

carbon fiber materials

Carbon fiber is one of the future materials in developing pieces at industrial, sportive and spare time level, its main advantage is the high mechanical resistivity together with its low weight.

We dispose of different kinds of fiber tissues and of the most modern production systems, in order to offer the best service and attention to our customers.

The applications and featured products in this catalogue are just an example of the most representative. We can produce almost any type of pieces according drawing or sample. We use the most advanced CAD design program (Autocad, Solid Edge, etc.)

Our enlarged experience in this branch gives us the safe-confidence to contribute most suitable technical solutions and the most specialized advice.
